B-14B. BASES OF CHARGES FOR DEPRECIATION

1. Report under each of the plant accounts in column (a) all subclasses of plant for which a depreciation rate is determined and a subtotal for each primary account.
2. The net salvage factors in column (d) shall be shown as a percentage of original cost.
3. A "W" in column (b) indicates a whole life rate in column (f), an average service life in column (c) and average net salvage in column (d); and "R" indicates a remaining life rate in column (f), an average remaining life in column (c), a future net salvage in column (d).
4. For each plant account, report in column (f) the prescribed depreciation rate or those used by the utility in accordance with USOA.
5. The depreciation rate in column (f) for primary plant accounts for which subclasses or vintages are used, the life in column (c), net salvage percentage in column (d) and the accumulated depreciation percentage in column (e) are to be composite so that the resulting calculated composite rate produces the same charge to operating expenses as the sum of the individual rates applied to the individual classes of plant.
